Description

DefendX is the worldwide leader in the management and control of unstructured file data. Every day, our technology manages the storage resources of more than 20 million users. - Our legacy is built on technology excellence and open solutions have been proudly self-funded since the beginning - Our seamless solutions offer true, multiplatform flexibility, and have been used on every continent (including Antarctica) - Our partners are market-leaders, including DellEMC, Hitachi Vantara, Microsoft, and NetApp Our goal is simple. We want to help you regain control of your storage environment by giving you the information you need to understand, optimize, and manage it. We'll help you bring structure to your unstructured data. And we'll do it in a way that improves your day-to-day efficiency and respects your budget.
