Expiration Date: 0000-00-00 00:00:00

Description

We carry out two types of health checks. Both include checks on your physical characteristics with the difference of opting for a Full Lipids test or a Diabetes test. The Lipids Health Check consists of the following: Blood Pressure Pulse Rate Height Weight Body Mass Index (BMI) Full Blood Count Biochemistry Profile (RFT/LFT/LIPIDS) The Diabetes Health Check consists of the following: Blood Pressure Pulse Rate Height Weight Body Mass Index (BMI) Full Blood Count Fasting Blood Glucose Hemoglobin A1c Level For individuals who wish to check for both Full Lipids and Diabetes, you will opt for the Combined Health Check which consists of the following: Blood Pressure Pulse Rate Height Weight Body Mass Index (BMI) Full Blood Count Biochemistry Profile (RFT/LFT/LIPIDS) Fasting Blood Glucose Hemoglobin A1c Level Results for most of your checks will be available to you immediately, however results of your full blood count will take approximately 48 hours to return from the laboratory. This could take up to 72 hours depending on which day of the week your bloods have been taken, i.e. results of bloods taken on Friday will be available on Monday.
