SPI Lasers is a leading UK designer and manufacturer of optical fiber-based lasers. The company was set up in 2000 and has since gone onto sell its products commercially, on a global scale. Specialising in designing and manufacturing lasers for cutting, welding, marking, engraving and micro machining, the company currently supplies its products to a wide range of industries from automotive and medical to consumer electronics, solar and printing. SPI Lasers was listed on the UK stock market in 2005 and acquired by TRUMPF in 2008. The company operates its research, development and manufacturing in the United Kingdom and has

additional sales and customer support departments in both Asia and North America. SPI Lasers' aim is to become the world's leading supplier of commercial fiber-based lasers by continually investing in its innovative technology and remaining one step ahead of competitors. The company's full range of products and applications can be found on the SPI Lasers website.

Brand Grade: Grade One
