At Aero Fire & Rescue Ltd we pride ourselves in providing a professional, individually tailored solution to all your specialist fire cover and support service requirements. "We provide a personal tailored service." We cover a wide spectrum of services for event organisers, the film and television industry and other commercial operators. We offer extensive experience in both the firefighting industry and film and event support at competitive rates. With access to contemporary vehicles, the highest standard of equipment, professional experienced crew and safety advisors. Aero Fire & Rescue Ltd can offer a dynamic service for all clients both in

the UK & Overseas. We are reliable professionals with over 20 years of experience, We listen to our customers and work with them to address their needs through innovative solutions.

Technical Rescue

Aero Fire & Rescue work across all disciplines of water, rope and confined space to provide innovative, reliable and robust safety and rescue services to our clients. Often faced by combined risks, our teams are expert, well trained, experienced and tested so you know they can be counted on, if the time arises. Our role as standby rescue is often combined with providing access solutions to get workers, engineers, surveyors and examiners to the difficult access site. We often work in regulated, high risk environments so when you partner with us, you get scale, experience and a disciplined team. From the industrial plants to partnering on operations with the emergency services, we are trusted to deploy to high risk, high profile, high pressured environments to provide professional and resilient support.

Our operations office is open 24/7 as we have a duty team on call. This means you get the benefit of being able to speak with us any time of day or night when we have team working with you. Standby and rescue teams are rarely tested, so when deployed our teams add value by conducting training, tool box talks, equipment checks etc to work with you to build and enhance your safety culture.

Working At Height

Aero Fire & Rescue operate a comprehensive safety and rescue standby service for working at height. All our technicians are multi disciplinary. We are also used to working in high risk, safety critical, high profile environments. Our teams are disciplined, properly equipped, with the protection of a full audit system, attentive to their duties and very well prepared in terms of planning, documentation and experience. With the scale and reach of our operations we are able to react to changes in deployment length and circumstances driven by weather. This resilience in terms of equipment, people and skills is essential to keeping your project moving forward when you hit unexpected challenges. Our teams will also brief and train operatives on safe working at height and rescue procedures, check client PPE (for example check condition and test dates on fall protection equipment) and support proactively to build the safety culture and support your task. We will

work with you to write and develop your hazard register, risk assessments, method statements, response plans etc for the working at height element of what you are doing. Our teams are all first aid qualified and first aid experienced. They deploy with a comprehensive first aid / trauma pack together with oxygen and defibrillator. Often they will have rescue stretchers and rope rescue equipment with them too, depending upon the nature of the work environment. Our support office is manned 24/7. This means you can always get hold of us and we will always respond to your urgent requests if it is possible to do so. Our deployed teams are supported by a duty manager and are subject to site audits to maintain standards and improve performance.

Confined Space

Aero Fire & Rescue has developed specialist skills, experience and knowledge gained from working in difficult and potentially dangerous environments, to effect the rescue and escape of workers from underground. We have been able to expand and diversify to meet the needs of today's health and safety market. We have leveraged our expertise and have branched out into providing unique rescue services and specialist equipment (some of which has been designed using practical expertise gathered on the job). At Aero Fire & Rescue, we can provide highly specialised rescue and safety cover that can be tailored to meet your exact requirements and complies with Regulation 5 of the Confined Spaces Regulations 1997. We also offer a highly professional consultancy service for those requiring risk assessments, method statements or safe systems of work for hazardous tasks. On request, we can also provide a confined space assessment service which will highlight areas which can be designated as low, medium or high risk confined spaces. If you wish to use your own trained personnel to carry out work in confined spaces, we can provide experienced, competent and accredited rescue / safety cover using one of our Emergency Response Teams.

Water Rescue

Aero Fire & Rescue operate a comprehensive safety and rescue standby service for work near or on water. All our technicians are multi disciplinary. In combination with our extensive range of boats and other water rescue equipment, this enables us to maintain effective cover in changeable water and weather conditions. Our teams are equipped and trained to operate from bank or beach, on mud, through

vegetation, in shallow wading water, on deep slow water on fast moving water, from boat, sled or in water swimming rescues. Having serving and retired emergency service workers on our team, you can be sure you are getting the best that's available. We are also used to working in high risk, safety critical, high profile environments. Our teams are disciplined, properly equipped, with the protection of a full audit system, attentive to their duties and very well prepared in terms of planning, documentation and experience. With the scale and reach of our operations we are able to react to changes in deployment length and circumstances driven by weather. This resilience in terms of equipment, people and skills is essential to keeping your project moving forward when you hit unexpected challenges. Our teams will also brief and train operatives on water PPE and rescue procedures, check client PPE (for example check condition and test dates on life jackets) and support proactively to build the safety culture and support your task. We will work with you to write and develop your hazard register, risk assessments, method statements, response plans etc for the water element of what you are doing. Our teams are all first aid qualified and first aid experienced. They deploy with a comprehensive first aid / trauma pack together with oxygen and defibrillator. Often they will have rescue stretchers and rope rescue equipment with them too, depending upon the nature of the work environment. Our support office is manned 24/7. This means you can always get hold of us and we will always respond to your urgent requests if it is possible to do so. Our deployed teams are supported by a duty manager and are subject to site audits to maintain standards and improve performance.
