ABOUT GRIPDECK GripDeck® have been manufacturing a superb range of slip resistant products since 2000, all proven to eliminate or reduce slipping hazards in public access areas and work places. We can provide off the shelf and bespoke anti-slip solutions for stairs, footbridges, access ramps, decking, pontoons, boardwalks, vehicle steps and many others applications. 100% INDEPENDENT MANUFACTURER GripDeck are totally independent and unlike some providers of anti slip timber products, we can source product and materials from all the major timber merchants and suppliers. This means GripDeck are free to offer you the widest range of timber decking products, at the best possible price.

Whatever your project, whether its a simple set of steps or a complex rail site, our range of products, unrivalled industry knowledge and installation experience will greatly improve safety for the public and your workforce, in and around your

workplace EUROPE'S LEADING SUPPLIER OF SAFETY DECKING AND ANTI-SLIP PANELS The GripDeck® team has many years of experience in non-slip products and civil

engineering. The company operates across the UK and Ireland and now also

regularly supplies anti slip products to mainland Europe. THE WHOLE PACKAGE

From consulting on the ideal anti-slip solution, to custom manufacturing our own

specially formulated products and installing them with minimum levels of on site

disruption, GripDeck® offers the complete anti slip service. GRIPDECK® ANTI-SLIP

DECKING: SAFETY UNDERFOOT – FOR EVERYONE

GripDeck has over 20 years experience in developing, manufacturing and supplying

non-slip timber decking solutions to prevent you, members of the public, employees and visitors from slipping on your premises or in your home. With over 70 years of combined technical, design and product development experience, our dedicated staff are able to offer the best professional advice to industry and domestic customers. Perfect for commercial premises, public spaces, railways, gardens and many other locations. Investing in GripDeck's world-class anti-slip decking products will be the safest thing you can do.

HARDWOOD & SOFTWOOD NON-SLIP DECKING

GripDeck® manufactures a complete range of anti-slip decking in softwood and hardwood, available in a range of lengths and sizes, including smooth and grooved profiles. All products feature our factory-applied inserts, pre-bonded into the timber. Working alongside some of the UK's largest timber and builders' merchants, we have established an extensive network of suppliers. This means we can provide you with any available type of timber – in any size. Tell us what you need for your project and we will provide you with a competitive quote.

RETROFITTED ANTI-SLIP

DECKING INSERTS

If your decking is pre-laid, or you want to add our products to your timber, then we supply a range of inserts and anti-slip products to give you a safe, effective, long-lasting retrofit anti-slip decking solution.

NON SLIP INSERT SERVICE FOR YOUR

TIMBER

GripDeck® offers a Non Slip Insert Service, ideal for timber merchants and builders merchants to add GripDeck® inserts to your timber. This protects your timber

margins and adds value to your decking.

GRIPDECK® SOFTWOOD ANTISLIP DECKING

Our elegant Softwood anti-slip decking boards are made from high grade European

Redwood timber, and is available in five standard thicknesses and two standard widths, alongside a choice of stock lengths. Need a bespoke solution for your

project? Talk to us about our cut to length service.

GROOVED & SMOOTH SOFTWOOD

DECKING BOARDS

Choose from grooved or smooth preservative treated timber boards coloured a pale green, which when exposed to daylight transform into a honey brown, and long term, to silvery grey.

Aggregate used in the anti-slip inserts is a standard grey bauxite, but other shades and colours are available.

Each section of SW softwood anti-slip decking is carefully made in the United

Kingdom, drawing on nearly two decades of manufacturing experience. Our clients

are based across the UK and Ireland, as well as on continental Europe. We will supply your softwood decking with a minimal level of disruption to the site. Talk to GripDeck today about your softwood decking requirements and get an idea of prices by requesting a quote.

HARDWOOD ANTI-SLIP DECKING
Discover our premium quality hardwood timber with an excellent lifespan. A variety of high grade woods are available, including Yellow Balau, Garapa, Ekki, Opepe, Oak, Iroko. Colours vary, and fade to a natural shade of grey after long-term exposure to daylight. The non-slip aggregate component is grey bauxite, but other shades and colours are available.

SMOOTH OR GROOVED NON-SLIP DECKING
Standard decking board sizes are 21 x 145mm & 28 x 145mm, while lengths are 1.8m to 5.4m. We also offer a bespoke cutting service should you need it. Opt for either smooth or grooved timber. Each timber board is manufactured in the United Kingdom to the very highest standards, ensuring your new decking lasts for 20 years+. Clients from across the UK and mainland Europe choose GripDeck for project after project, thanks in part to the excellent non-slip credentials of our hardwood products. Our independently-tested hardwood timber decking ensures a low slip risk in both wet and dry conditions. Talk to our team about your project. With 18 years of experience in the non-slip decking industry, no one understands your decking needs better than GripDeck.

ANTI SLIP THERMALLY MODIFIED TIMBER DECKING
GripDeck® thermally modified timber is a beautiful alternative to regular tropical hardwood and treated timber decking. Our chemical-free thermally modified boards can be supplied plain or with anti-slip inserts, and therefore ideal for a wide range of public and domestic applications.

QUALITY ASH, PINE & SPRUCE DECKING
Choose from ash, pine or spruce boards, in standard sizes of 26 x 115mm & 26 x 115mm, and standard lengths of 1.8m to 5.4m. If you need bespoke sizes and lengths, they can be cut to order. Each length features two anti-slip inserts, but three or more can be added to order. The standard colour of the aggregate anti-slip insert is grey bauxite, but others shades can be integrated upon request. This eco-friendly decking is perfect for a wide range of locations where there may be a slip risk for members of the public or your workforce.

ENVIRONMENTALLY FRIENDLY DECKING
The timber itself is thermally modified using a heat-and-steam process, with no chemicals whatsoever – making it the ideal choice for projects where

environmentally friendly decking is required. Thermal modification also makes wood highly durable and very stable. AWARD-WINNING NON-SLIP DECKING BOARDS
Our non-slip decking has been awarded the DeckMark Plus rating, and we are members of the Railway Industry Supplier Qualification Scheme, meaning you'll find our non-slip decking on walkways, steps and crossings throughout the UK railway network, keeping both the public and railway employees safe – even in the most treacherous of conditions. Our products make decking non-slip, safe and

presentable for everyone WHY PICK GRIPDECK®?
