My company UKDataSecure exists to help you to perpetually protect your data and information security assets, to avoid data and information loss through security incidents and breaches, in order to maintain the continued viability of your organisation. Please visit our website at www.ukdatasecure.com, or contact me directly at info@ukdatasecure.com, 02380 972066 or 07824 445375. I am proud to be a considered a reputable Senior Leader in the Information Security industry with a proven history of success in pioneering and driving high-level strategies to ensure compliance with multiple standards and regulations (ie. PCI DSS, GDPR) across a range of complex business landscapes. With over 35 years of industry insight, I support businesses to demystify and comply with data security standards such as PCI DSS, GDPR and Cyber Essentials. I inform corporate strategic direction for protecting sensitive and confidential data, outlining key issues and risks and developing robust Governance structures and practices. As the Founder and CEO of UKDataSecure, I have been actively involved in governing and managing PCI programmes with multiple UK based retailers for over eleven years. I have significant connections within the Information Security industry which are invaluable to clients delivering holistic information and data security risk reduction programmes. Throughout my career I have leveraged my extensive communication skills to establish and maintain strategic partnerships with clients and stakeholders, including many major high street brands, and to steer key negotiations to secure multi-million-pound investments and mentored and empowered individuals at all

levels. A collaborative presence in the Board room, I have consistently offered constructively challenging advice, ensured accountability to influence Executive leadership and embedded cultures of consensus to unite businesses under a shared vision and improve overall efficiencies.
