Deepdy is a software company based in London, focused on call identification and call blocking. It was founded in 2013 by Alberto Edroso Jarne and comprises two platforms:

Unknownphone.com - A website that helps users to identify who called them by phone.

CallBlocker - An app available for iOS and Android that identifies and blocks incoming calls automatically if the caller has been reported and/or flagged as a potential spammer.

Deepdy identifies more than 20 million spam numbers, from all over the world, every year. Their platform is offered in 25 languages. In 2020 their app CallBlocker

was downloaded more than 1 million times.

Furthermore, Deepdy offers a private API that ensures the best and most flexible solution for third parties who want to implement caller ID and spam filtering services. Phone: 07936733562

Brand Grade: Grade One
