

Maedutainment Online Maths Tutor

United Kingdom

Every child is unique. But the one thing that is common among most children across the globe is a fear of mathematics. Some people get so anxious as soon as they hear this word that they end up developing a 'Math-Phobia'. Children often get judged based on their academic scores which can leave a permanent scar on their self-esteem and confidence. But parents, do you know that low scores do not reflect a lack of skills but lack of proper guidance? We at Maedutainment offer individual and specialised attention to all our students to grow and learn. You can visit our website to know more about our online tutoring services.
