Bugendaitech has functioned as a remote corporation from its beginnings. With Salesforce consulting experience, we're a Salesforce ISV (Independent Software Vendor) partner as well as a Google and AWS partner. Data Science Solutions, Website Development, SEO (Search Engine Optimization) & Digital Marketing, and SAP Solutions are some of the areas where we work. At BugendaiTech, we aim to make your learning experience the best it can be, and our programmes are designed to give graduates and interns the information, skills, and experience they'll need to stay and succeed in the future.
