Gas Installation Gas appliances such as ovens and fires must be fitted by trained professionals. Our experienced heating engineers are all fully GasSafe-registered and may be relied upon to install any kind of gas appliance with skill and precision.

Heating Here at Plumb Excel Ltd, we design, install, and maintain central heating systems of the highest quality in homes across Cheltenham. We strive to find the most energy-efficient system for your home – one that will heat your property with minimal heating costs.

Plumbing We help all our Cheltenham customers with their plumbing and drainage needs. Whether you have a leaky appliance, a burst water pipe, an overflowing toilet, or something worse, we are there for you. This includes emergency plumber service when you need help urgently.

System Power Flushing Power flushing is a fast and effective way to clean out your boiler and central heating system. We use water and cleaning agents that are sent through your system at high speed, but low pressure, to avoid damaging your system in the process.

Bathroom Installations Fitting a new bathroom in your Cheltenham home needn't be a chore. We provide an end-to-end service, from the initial design to laying the last tile. This includes all plumbing, fixtures, and fittings you need to achieve the bathroom you've always dreamed of.

Boilers If you want a new boiler fitting in your home, or an existing boiler replacing, give Plumb Excel Ltd a call today. Our GasSafe-registered heating engineers will recommend the most energy-efficient model to meet your particular needs, installing it quickly and safely.
