

Level 2, 71 Longueville Road
Lane Cove, NSW 2766
Australia

SURV3D is a specialised company that conducts surveys in Sydney, NSW, and adjacent areas. In this capacity, we have extensive experience developing land and buildings. Our services extend from conception to completion. The SURV3D team specialises in contemporary survey methods and modern, innovative 3D solutions. This is a means of delivering highly accurate surveys with quick turnaround times. Our highly qualified staff, in conjunction with the latest software, equipment, and techniques, help us achieve this objective. Our Scan-to-BIM service extends above and beyond our standard 3D Laser Scanning service. There is a possibility you lack the necessary time or resources to convert point cloud models to BIM.
