Solico Tanks is a leading provider of custom GRP panel type water storage tanks, specializing in tailored systems for industrial, residential, and municipal applications. With over 55 years of experience, we combine in-house engineering expertise with cutting-edge manufacturing to deliver durable, sustainable, and high-quality tanks designed to endure extreme conditions, including harsh weather and seismic events. Our tanks are available in a range of sizes, including configurations up to 50m x 50m and 6m in height, and are ideal for both large-scale and complex projects. Manufactured at our 400,000 ft² state-of-the-art facility in Jebel Ali, Dubai,

our tanks use premium ISO-NPG resins and proprietary SMC blends, ensuring exceptional strength, UV protection, and chemical resistance. As part of our commitment to sustainability, our production process is solar-powered, and we prioritize eco-friendly practices across every step. We are proud of our globally recognized certifications, such as ISO 9001, AWWA D121-12, and NSF 61, and we provide long-term reliability with a manufacturer's warranty on all our products. Solico Tanks is dedicated to delivering customized water storage solutions that meet the unique demands of our clients. Whether for iconic projects or expansive installations, we take a collaborative, customer-first approach, ensuring timely, efficient service and a commitment to quality. Our team's vast experience guarantees that even the most challenging projects, including complex shapes and severe environmental conditions, are met with reliable and innovative solutions. With a focus on integrity, collaboration, and continuous improvement, Solico Tanks stands as a trusted partner in the water storage industry.
