At Stream Audio, we empower broadcasters of every size to get on air quickly and affordably. Built “by radio people, for radio people,” our UK-based team delivers rock-solid SHOUTcast and Icecast hosting on local servers with a 99.97 % uptime guarantee, so your audience enjoys dependable, buffer-free listening around the clock. We pair our reliable infrastructure with the tools you need to run a professional station. Choose the control panel that suits your workflow—CentovaCast for its robust statistics and playlist automation, or MediaCP for intuitive AutoDJ, geolocking and embeddable widgets. Every stream benefits from unlimited bandwidth, multiple mountpoints, secure SSL encryption and detailed listener analytics, giving you the freedom to grow without technical

limits Every plan also comes with powerful extras at no extra cost. We supply a fully responsive HTML5 web player styled to match your brand and a custom Alexa skill that places your station on millions of smart speakers worldwide. With a free 14-day trial and prices starting at just £2 per month for 128 kbps streaming—or upgraded tiers with higher bitrates, AutoDJ storage and even unlimited listener slots—you can scale precisely to your needs while keeping overheads low Whether you are launching your first hobby stream or migrating an established network, our friendly support team is ready to help you succeed. Explore our preset packages online or contact us for a bespoke solution—we're only an email away at hello@streamaudio.co. Let's connect your sound to the world, effortlessly.
